

**NORTHERN TERRITORY OF AUSTRALIA
BUILDING ACT
SECTION 40 – CERTIFICATE OF COMPLIANCE – STRUCTURAL DESIGN**

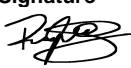

All sections must be completed – mark N/A to any question that does not apply

PROPERTY / PROJECT DETAILS	
Owner (if known):	
Lot/Portion Number:	Address:
Location:	Town / Hundred :
Description of works : B & D SERIES 1 WINDLOCKED ROLLER DOOR – 3.0M HIGH X 3.15M WIDE MAXIMUM FOR USE IN WIND REGION C, TERRAIN CATEGORY 2 AND UP TO A MAXIMUM ULTIMATE WIND PRESSURE RATING OF 3.26KPA	

DOCUMENTS ATTACHED
Drawing Nos: Engineering Drawing Numbers 2212/S01H, 2212/S02H 2212/S03H and 2212/S04H by James Ellis & Associates Pty Ltd (attached)
Other:

DESIGN BASIS (please list relevant Standards used in the design)			
Test report no. TS894 Revision A from the Cyclone Testing Station - School of Engineering and Physical Sciences at James Cook University, Principles of Mechanics, AS/NZS 1170.2:2011 Structural design actions Part 2: Wind actions, AS4100:1998 Steel structures, AS/NZS 1170.0:2002 Structural design actions Part 0: General principles, AS/NZS 1170.1 Structural design actions Part 1: Permanent imposed and other actions, AS/NZS 4600:2005 Cold formed steel structures, AS1720.1:2010 Timber structures Part 1: Design methods, AS/NZS 1664:1997 Aluminium structures Part 1: Limit state design, AS 3700:2001 Masonry structures, AS/NZ 4505:2012 Garage doors and other large access doors, Ramset - Specifiers Resource Handbook, Buildex Fasteners - Technical specifications			
Class of Building (BCA): All	Type of Construction (BCA volume 1 §C1.1): N/A (eg. Type A fire-resisting construction)		
Building Importance Level (BCA Table B1.2a): 2	Annual Probability of Exceedance for Wind (BCA Table 1.2b): 1 in 500		
Region: C	Regional ultimate wind speed V_R (m/s): 69.3 m/s	Terrain Category: 2	Reference height (m): 3.0m
$M_{z,cat}$: 0.91	M_s : 1	M_t : 1	V_{des} Design Wind Speed at reference height (m/s): 63.06m/s
Internal Pressure Coefficients ($C_{p,i}$):	+0.6, -0.3		
External Pressure Coefficients ($C_{p,e}$)	Walls	-0.65, +0.8	
	Roof	N/A	
Net Pressure Coefficients: ($C_{p,n}$)	Roof / Walls	N/A	
Imposed Loads, kPa	Floor / Roof	N/A	
Earthquake Design Category, EDC (Table 2.1 of AS 1170.4): N/A			
Annual Probability of Exceedance for Earthquake Actions (BCA Table 1.2b): 1 in N/A			
Importance Level (BCA): N/A	Hazard Factor, Z (Section 3): N/A	Class of Sub-Soil (Section 4): N/A	
Safe Foundation Bearing Capacity, kPa: N/A		Site classification (AS2870): N/A	

COMMENTS / EXCLUSIONS (Exclusions to this Certificate must be clearly identified).
The following items are excluded and shall be certified separately: The structure to which the door is attached shall be assessed and certified independently as required by a suitably qualified engineer.
Comments: This certificate relates to the structural adequacy of the B & D Series 1 wind-locked roller door only. The subject doors are rated to the relevant ultimate design wind pressure as stipulated in the design criteria of the attached engineering drawings. The building certifier or local authority is to ensure that the ultimate design wind pressure rating given on engineering drawings is relevant to the intended location of all doors.

CERTIFICATION BY STRUCTURAL ENGINEER			
Company Name : James Ellis & Associates Pty Ltd		Company NT Registration Number	
We certify that reasonable care has been taken to ensure that the structural engineering aspects of the works as described above have been designed in accordance with the requirements of the Building Code of Australia and the Northern Territory Building Regulations.			
Name : James Ellis	Individual NT Registration Number 47429ES	Signature 	Date : 1st November 2013

SCHEDULE OF STRUCTURAL INSPECTIONS REQUIRED

Inspection of construction is required at all stages indicated below.

- [] 1. Completion of site preparation/site filling/excavations for footings prior to placement of any reinforcement or concrete.
 - [] 2. Completion of preparations for placing of concrete strip footings including placement of reinforcement.
 - [] 3. Completion of preparations for placing concrete slabs including compaction of fill and sand blinding, placement of formwork, reinforcement, starter bars and cast in items.
 - [] 4. Completion of preparations for placing of concrete pier footings including reinforcement (if any).
 - [] 5. Starter bars and cast in items after placing of concrete and prior to any covering up work.
 - [] 6 Reinforcement to walls completed prior to core filling (inspection holes and cleanout cores to be completed).
 - [] 7. Structural steelwork and cold formed steelwork completed and prior to any covering up work. Floor framing system completed before floors are laid or underside is lined.
 - [] 8. Suspended concrete floor slabs with formwork, reinforcement and cast in items completed, prior to placing of concrete.
 - [] 9. Wall framing or blockwork wall core filling completed (with windows fixed in place) and roof framing with connections completed and prior to sheeting or lining.
- Note: [] Prior lodgement of truss manufacturer's drawings, details and certification required.
[] Prior lodgement of windows manufacturer's drawings including fixings and certification required.
- [] 10. Structural wall linings completed and prior to any covering up work.
 - [] 11. Final inspection upon completion of all structural work including fixings of external roof and wall claddings, flashings, barges & vents.
 - [] 12. Other Inspections as required by the building permit

Important Information:

- 1) The above inspections are required to be carried out by either the certifying engineer or the building certifier who issued the building permit for the work. (If no inspections are indicated refer to the certifying engineer for advice).
- 2) Where works are prescribed building works under the *NT Building Act*, the building certifier must be provided with a copy of the inspection record and no further works must be carried out by the builder until the building certifier issues a release to proceed with further works.
- 3) Additional non structural inspections may be required during the course of construction before the issue of a Permit to Occupy (refer to building certifier for requirements).
- 4) Failure to obtain inspections may prevent the issue of a Permit to Occupy upon completion of the building works.
